

Energy Management Policy

We at Deki Electronics Limited, NOIDA, manufacturers of Film Capacitors in India are committed to continually improve our energy performance and reduce energy cost & carbon footprints. To achieve this, we shall:

- Continually improve organization's energy performance through implementation of Energy Management System, energy conservation and use of renewable energy sources wherever possible.
- Provide a framework for setting and reviewing objectives and energy targets including necessary information and resources.
- Consider energy performance improvements in design and modification of our facilities, equipment, systems and processes.
- Procure energy efficient products, equipments and services that impact energy performance.
- Comply with all applicable legal and other compliances including requirements of interested parties related to energy use, consumption and efficiency.
- Review EnMS policy & system periodically to ensure relevancy & appropriateness to the organization.

This policy has been made available to the public by displaying the same on website and outside the factory main gate.
